Infinity[®] 26 Air Conditioner with Greenspeed[®] Intelligence & Infinity[®] 24 Heat Pump with Greenspeed[®] Intelligence

The Carrier[®] Infinity[®] 26 air conditioner and the Carrier[®] Infinity[®] 24 heat pump for heating and cooling take Carrier's most advanced technology to the next level with our highest efficiency models.

Greenspeed intelligence pairs a variable-speed compressor with Infinity[®] System Control to adapt the unit's output to the needs of the home. With tiny adjustments between 25 and 100% capacity, it gives the home only the amount of cooling necessary. The system operates longer at lower capacities, ensuring incredible energy efficiency and quiet operation with tighter temperature control.

The Infinity 26 & 24 offer a number of benefits for technicians. Bluetooth[®] technology is available on the outdoor unit for easy access to diagnostic information from inside the home. The equipment is compatible with a service tech app that includes the fault history, system parameters, and interactive fault trees. Over-the-air software updates are available, and technicians can assess over 130 diagnostic points. Plus, the equipment features two-wire installation, is self-configuring, Infinity[®] Zoning System-capable, and installations can use up to 250 equivalent feet of refrigerant line length.

Product Specifications

Infinity® 26 Air Conditioner with Greenspeed® Intelligence

- **SEER:** 26
- **EER:** 16.5
- **Capacity:** 24,000-60,000 BTU/h
- CEE Tier 2

Infinity® 24 Heat Pump with Greenspeed® Intelligence

- **SEER:** 24
- **EER:** 15
- **HSPF:** 13
- **Capacity:** 24,000-60,000 BTU/h
- **Capacity Ratio** 17°F/47°F (%): 89.6%
- CEE Tier 3 for South and Southwest

- ENERGY STAR® Most Efficient
- AHRI 1380 Certified
- **Connected Protocols:** Wi-Fi, OpenADR 2.0
- **Platform Compatibility:** Amazon Alexa
- **Warranty:** 10 year limited replacement warranty upon timely registration, except where limited by jurisdiction
- **Energy Management Features:** Outdoor temperature sensing; vacation, away, or nighttime mode; “eco” or low power mode; energy consumption reporting or energy meters; motion sensing
- **Load Management Features:** Demand response capable
