240-Degree LED Smart Motion- Activated Flood Light

The 240-Degree LED Smart Motion-Activated Flood Light's innovative lens shines in front and directly below, creating an attractive wall wash while lighting hidden areas to provide safety and security for backyards and driveways.

Installation is quick and easy with one screw mounting, pre-installed quick connectors, and our free Good Earth Lighting App (no hub required). The light can operate in three modes: default setting, manual mode, or custom mode. There is no need to get on a ladder and adjust the settings - you can easily set up the motion-activated security light, all night area light, color temperature, brightness, distance range up to 100-ft, timer, schedules, grouping, and more from your phone even if the Wi-Fi goes out with Bluetooth wireless backup. Dusk/dawn settings are not affected by trees or foliage. Hands-Free Voice Control works with Amazon Alexa and Google Assistant. The IP65 and cold weather rating (min. cold start temp of -20°) make it ideal for outdoors. This fixture has universal mounting that allows for wall, eave, or surface installations. Available in white and bronze finishes.
