

Lighting Controls

Smart Lighting
with Netatmo

Optimized for whole-home use, **adorne®** and **radiant®** with Netatmo solutions create a robust, dedicated network that can support advanced control of lights and power in any home environment.

This makes the solutions ideal for larger homes and homes where Wi-Fi signals might struggle due to building material or the use of many smart products. The solutions install in place of standard switches and outlets, and can be easily setup in just a few taps. They can also easily connect to Amazon Alexa, Google Assistant, or Apple HomeKit, or to leading home automation systems, to provide more comprehensive control.
