

Water Heating

**Rheem®
ProTerra™**

The new degree of comfort.®

Easy to install, service and sell, the new Rheem® ProTerra™ Hybrid Electric Water Heater is the smartest and most efficient water heater available.

It delivers impressive savings for homeowners – right away with a \$300 federal tax credit and local utility rebates, and ongoing with up to \$480 energy cost savings each year. The ProTerra uses 75% less energy than a standard electric water heater to help minimize your impact on the environment. Plus, it's full of smart features your customers will love – from built-in WiFi to our exclusive Water Leak Detection. Easy replacement with the same dimensions as a standard electric water heater and one-button startup. With zero clearance requirement, the ProTerra Hybrid is a great option for homes with less space, even in closets. Save yourself time with built-in leak detection, automatic water shut-off valve and WiFi control. Program the water heater to match demand throughout the day – higher production during high use times, like the morning, and lower production for energy savings when no one is home and off-peak energy rate scheduling with built-in demand response. Reduce water heating costs while homeowners are away for a week or just for the day – it's easy to set from a phone from anywhere through the free Rheem EcoNet app.

Product Specifications

- **UEF:** 3.75
- **Rated Storage Volume:** 50 gallons
- **First Hour Rating (FHR):** 88 gallons
- **Lower Compressor Cut-off Temperature:** 37°F
