Sensi Touch Smart Thermostat

The Sensi™ Touch smart thermostat provides the best smart home experience including a large color touch screen, easy set-up, intuitive controls and compatibility with most popular home automation systems. With its top-rated mobile app, Sensi smart thermostats give you the flexibility to adjust your temperature and settings from anywhere.

ENERGY STAR® certified, Sensi can save HVAC energy using flexible scheduling, remote access, and geofencing. Sensi gives you the power to manage your comfort with a circulating fan, humidity control, keypad lockout, and temperature limits. Sensi features HVAC monitoring that alerts you of critical system issues.

The Sensi Touch is easy to install with a built-in level and illuminated easy-click terminals. The large color display features easy-to-read temperatures and intuitive menus. The sleek, modern design comes in three colors (black, white, and silver).

Emerson has been innovating in the heating and cooling industry for over 100 years and introduced its first smart thermostat in 2014. Since then, it has continued to update its wide range of thermostats and controls to put comfort first while focusing on the principles of simplicity and trust.

Product Specifications
