WAC WAC STRUT

Designed with a modern aesthetic and advanced technologies that captivate leading architects and designers, the WAC STRUT System of Architectural Solutions from WAC is an innovative lighting, power and control system complete with lighting elements designed for discriminating technical performance. STRUT incorporates direct and indirect illumination, wall wash, downlighting, accent lighting, and pendants utilizing connected control technologies to give clients a personalized and modular experience.

Built upon problem-solving lighting solutions for the most discerning and costly challenges in today's commercial, institutional, and residential projects, this intuitive system is modular, adjustable, user-friendly and future-proof, developed with advancements in optics, LEDs, sensors and controls that help promote productivity, visual comfort, health and wellness.

The modular system allows you to configure standard components for a customized 48V DC lighting solution. The magnetic infrastructure allows you to slide elements within the STRUT and adjust lighting effects while powered on-site.

Fully customizable, STRUT is easy to specify and order without special knowledge. This system can also adapt to changing in-process design decisions with ease.

Product Specifications

- **Light Output:** Various, up to 1,120 lumens/foot
- **Total Input Power:** Up to 600 W, 48V DC connected power unit
- **Dimming:** Dims to 0.1%; ELV, TRIAC, and 0-10V dimming protocol compatibility
- **Warranty:** 5-year warranty
- **Energy Management Features:** Optional vacancy and photo sensor, scheduling and automation features

Available NOW through WAC dealers.
