

Heating & Cooling

iFLOW Hydronic Furnace

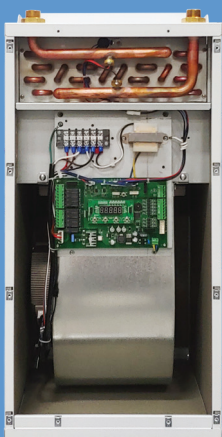

iFLOW HVAC Inc. manufactures the most advanced hydronic furnaces in North America.

When paired with high performing heat sources, they can outperform the best gas furnaces in the ENERGY STAR® program. By dynamically controlling the four main variables critical to achieving highest efficiency in a hydronic based forced air system (namely GPM, Δt_w , CFM, and Δt_a), iFLOW delivers maximum performance and ultimate comfort.

Employing a unique and powerful control strategy with a premium constant CFM variable speed ECM blower, on-board VFD hydronic pump control, Wi-Fi connectivity with the app enabling most smart thermostat functionality, and integrated zoning (up to four zones), the iFLOW can deliver ultra-steady temperatures to every room in your home. Even better, an iFLOW combi-system can be cash-flow positive from day one (energy savings offset costs) and all backed by the best warranty in the business! Experience an iFLOW Combi-System, the ultimate in comfort and efficiency.

Product Specifications

- 9% savings, on average, compared to traditional ENERGY STAR® gas furnaces
- **Connected Protocols:** Wi-Fi
- **Platform Compatibility:** None at this time
- **Warranty:** 5 years parts/10 years heat exchanger
- **Energy Management Features:** Outdoor temperature sensing; Vacation, away, or nighttime mode; “Eco” or low power mode
- **Load Management Features:** Demand Response capable
